Re: Professional Geophysicist Occupational Analysis

An occupational analysis will be available beginning Monday January 20, 2014 – Friday February 7, 2014 to all California-licensed geophysicists pertaining to the Professional Geophysicists (PGp) license. Please use the following link to access the survey via Survey Monkey:

(<https://www.surveymonkey.com/s/PGpOASURVEY>)

It is incredibly vital to your chosen profession that sufficient and appropriate licensees respond to the questionnaire so that the resulting examination test plan specifications truly and accurately reflect the respective practices as they occur in today's world.

The Professional Geophysicist occupational analysis questionnaire was developed through a collaborative effort between a group of Professional Geophysicists, the Board for Professional Engineers, Land Surveyors, and Geologists, and the Department of Consumer Affairs' Office of Professional Examination Services. Please complete the questionnaire based on your own practice within the last year.

Since you may hold additional licenses/certifications, be sure to answer each questionnaire from the sole perspective of the appropriate level of licensure as indicated by the questionnaire.

Individual responses will remain confidential. The summarized results from the initial questionnaire will help the Board to understand the current scope of Professional Geophysicist practice throughout the state and be used to develop new examination test specifications.

The entire questionnaire will only take about 30 minutes and your response is very important. Please note that the questionnaire must be completed by **Friday, February 7, 2014**.

If you have any questions about this process, please contact Patty Smith, the Board's Geology and Geophysics Program Lead Analyst at (916) 263-1847 or by email at patty.smith@dca.ca.gov. Thank you, in advance, for support of our licensure program.

Sincerely,
